Japanparts S.r.l.: important news

Our product range widens with gas springs for engine bonnets and tailgates

Japanparts S.r.l. presents in these days a new range that widens the already significant product offer, today one of the widest and deepest in the aftermarket. These are gas springs for engine bonnets and tailgates, accessory products highly subject to wear.

The range of gas springs included in the catalogue by Japanparts S.r.l. consists of 1,300 items for the most popular vehicles, with a circulating vehicle coverage of approx. 80%. The range for European and American cars - as well as for Asian cars - is enviable, evidence of the company's desire to be an increasingly global reference point for its customers.

Like every product offered by Japanparts S.r.l., the new gas springs strictly comply with Original Equipment specifications and undergo rigorous robustness and durability tests. The result is high reliability, so much so that the company offers them with a 24-month warranty. All this is made possible by the careful selection of suppliers, with great experience in this kind of products.

The gas springs offered by Japanparts S.r.l. are packed together with all components required for installation, such as brackets and supports; they are easy to assemble and do not require the use of any specific tool.

The range of gas springs by Japanparts S.r.l. is distributed with a completely redesigned packaging that captures the attention of consumers and highlights, through the slogan "Quality Tested", the quality of Japanparts, Ashika and Japko branded products.

As all the company products, the new gas springs offered by Japanparts S.r.l. benefit from a timely customer service, made possible also thanks to the recent important expansion of the warehouse in Verona, able to handle more than 15,000 pick-up lines on a daily basis.

JAPANPARTS s.r.l.

The Future is Now

To support the launch of the new range of gas springs, Japanparts S.r.l. has created three dedicated catalogues for Japanparts, Ashika and Japko brands, that can be downloaded at the following links:

<http://www.japanparts.eu/news.jsp>

<http://ashika.eu/news.jsp>

<http://www.japko.it/news.jsp>

The range is also available on the TecDoc platform.
